

Setting up our rental models is quick and hassle-free, ensuring a prompt response to your safety requirements. When you receive our showers, they are work-ready and fully equipped to address your emergency shower needs without any delays. We offer models in both general-purpose and Class 1 Division 2 electrical configurations, providing options to suit various environments.

Industrial Emergency Showers

The MES-400 self-Contained emergency shower, a larger and higher capacity model specifically designed for clients who require extended shower durations. The unit boasts a full containment sump and is certified to meet the stringent ANSI Z358.1 2014 standards, ensuring optimal safety and compliance.

What We Do

Even after 25 years+ of building customized units, we still think a little differently than most service companies. We like to think outside of the box, and create niche products and services for our clients.

Our specialty is Industrial and Remote Safety Services.

- **Emergency Showers**
- **Spill Response Trailers**
- **Safety Consulting**
- **Rentals**

Remote Operations

Our **Emergency Showers** are designed to be effortlessly transported while fully loaded with water.

This unique feature offers our clients immediate advantages in terms of **logistics** and **finances**.

Specifications
